

SiPM Testing Plan

- Pre-production testing
 - ▣ 1700 SiPMs in 13x13 trays (end of Sept./start of Oct.)
 - ▣ Vop +/- 1.5% and dark current for a fixed gain
 - ▣ Will answer many unknowns for production testing
- Full production testing
 - ▣ Tests
 - ▣ Equipment
 - ▣ Workforce
 - ▣ Tracking
 - ▣ Timeline

Tests/Equipment/Workforce

- Operating voltage and dark current for ~120k SiPMs
 - ▣ Hamamatsu will provide Vop and dark current for 3% of the SiPMs
 - ▣ 97% will have Vop within +/- 1V (or .5V?) (sufficient for grouping?)
- Testing module(s) from Debrecen
 - ▣ Current prototype is automated and holds 4 SiPMs, but can be scaled to our choice (64, 169?)
 - ▣ 1/2 hour/SiPM, but 64 or 169 won't take much longer
 - ▣ Cost?
- Workforce
 - ▣ Michigan (Augustana and Abilene have expressed interest)
 - ▣ Tracking SiPMs for board assembly will be majority of labor

SiPM Tracking

	41	63830	55.42	0.151

- Proposed packaging from Hamamatsu
- After testing, group by V_{op} and transfer in similar fashion for board assembly

Timeline

- Production purchase order comes up to 6 months after November CD-1 review
- Testing likely begins summer 2018
- 10k SiPMs delivered every 6 weeks
 - ▣ Test at least 333 SiPMs/day
(8 hours/day, 5 days/week)
- 72 weeks required to test 120k devices (~end of 2019)
